

## EDUCATION WATCH GROUPS

Sam Houston Tea Party supports education that is built on sound theories of teaching methods, proven content that is developmental and accurate and classroom discipline that supports the student with a positive environment for learning life skills. We support public schools, private and faith-based education, home schooling and learning through on-line resources. School choice lies with informed parents and their children.

Sam Houston Tea Party shares the community's concerns about the Agenda 21 based funds from non-governmental agencies such as the Houston-Galveston Area Council. Also the concern that Huntsville ISD sees continued failure of our students due to the use of the curriculum CSCOPE/ Common Core that is ill founded and has not been approved by the Texas Education Agency.

See the sites listed below as current and leading sources of information regarding Common Core's impact Nationally and within the States. Common Core is a product of a progressive agenda to set a standard in all schools.

Articles, Opinion, Research and Alerts regarding educational issues
